Healy Consultants makes Dubai Company Incorporation even easier

Leading corporate services provider Healy Consultants is responding to the growing demand for Dubai company incorporation by providing a comprehensive business orientation programme on the ground in the United Arab Emirates (UAE).

The programme includes tailor-made client tours of key points of business interest in Dubai and the UAE, including free zones, business parks, banks, and also provides other useful services such as networking opportunities and introductions to property agents. To date, a number of Healy Consultants' clients have benefited from the tailored tours, which are available from one morning to a full week.

'Arriving in a new country, especially such a rapidly developing city such as Dubai, presents many challenges, a key one being orientation,' says Healy Consultants managing director Aidan Healy.

'Many of our clients have very busy schedules. We want to help maximise their constructive time on the ground in Dubai – and that's why our tailor-made orientation services are so useful to them,' he adds.

'We're simply trying to make the decision to set up in Dubai – including the Dubai company incorporation process - as smooth as possible for them.'

The Dubai scheme mirrors the success of existing Healy Consultants business orientation programmes in Singapore and Hong Kong.

Healy Consultants provides international tax planning, asset protection, company formation in Hong Kong and throughout the world, corporate and private bank accounts, as well as migration into Asia. With a headquarters in Singapore, the Group also has offices in Dubai, Hong Kong and Perth, Western Australia.
